

COURSE DESCRIPTION

This intermediate level class focuses on the identification, assessment and treatment of the multiple factors that affect self-regulation. Children with self-regulation dysfunction tend to have behavioral breakdowns and present with inconsistencies in skills that are perplexing and limiting to functional output.

Participants will gain an understanding of how the factors connect and interact with each other and will learn practical and specific strategies to address each of the problem areas that you can begin to apply immediately. The information provided is highly effective for addressing these inconsistencies in behavior. Upon completion, participants will have multiple strategies to apply when treating this elusive problem. This class will prepare you to assess and treat children with self-regulation dysfunction.

COURSE OBJECTIVES

Those who complete this course will be able to:

1. Define the term Self-Regulation Dysfunction
2. Identify the structures involved in Self-Regulation
3. Identify the 3 levels of Self-Regulation Dysfunction
4. Label 2 factors that affect each of the levels of Self-Regulation Dysfunction
